Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Applicant is reminded that in order for a patent issuing on the instant application to obtain the benefit of priority based on priority papers filed in parent Application No. 09/596054 under 35 U.S.C. 119(a)-(d) or (f), a claim for such foreign priority must be timely made in this application. To satisfy the requirement of 37 CFR 1.55(a)(2) for a certified copy of the foreign application, applicant may simply identify the application containing the certified copy.

Information Disclosure Statement

The IDS filed on 2/20/04 has been partially considered by the examiner. The foreign references are not provided, therefore, they have not been considered at this time. The Japan and/or foreign documents, if they have not been written in English are considered to the extent that could be understood from the English Abstract and the drawings.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakurai (US 5210734).

In regard to claim 1, Sakurai teaches an information reproduction method for an information recording medium including a management information area (column 1 lines 66-68); and a data recording area including a plurality of sectors to which physical sector number are respectively assigned; wherein: the management information area includes an area for recording a physical sector number of a sector to which a logical sector number "0" is assigned (fig. 5B), among the plurality of sectors included in the data recording area, the information reproduction method comprising: reading the management information from the information recording medium; and obtaining the physical sector number of the sector to which a logical sector number "0" is assigned (see fig. 6 where Logical Sector Number 0 follows directly after the TOC).

In regard to claim 2, see claim 1 rejection above.
